Association--November 2007

Richard Chinn's Wetland
Delineation Training-
August 2007

American Society of Mining and
Reclamation-
Annual National Conference
Gillette, Wyoming-- June 2007

SKILLS SUMMARY

Project management, field surveys and report preparation for a variety of projects include: baseline assessments, reclamation monitoring projects, small and large mine permits and threatened & endangered (T&E) species surveys.

Vegetation monitoring (cover, production, shrub density)

Vegetation community mapping

Tree density sampling using point-center quarter method

(T&E) plant species surveys and habitat surveys

Wetland delineations

Collected & analyzed data using the cover frequency method while working for the U.S. Forest Service.

Acquired plant identification skills while participating in Range Judging Contests, and completing a Range Plant Identification course. Also used a taxonomic key to identify grasses in a Grass Systematic Course. Enhanced those skills in the field while working for the U.S. Forest Service and Ecosystem Research Group.

Collected and analyzed data using the following methods: frequency, density, step-point, modified step-point, visual obstruction readings using a Robel Pole, weight estimation and double sampling as well as basic statistical analysis as part of my Vegetation Inventory and Analysis Course.

Participated in a management team that assembled a land management plan for a Land Resources Management Planning Course.

PROFESSIONAL EXPERIENCE

BKS Environmental Associates Inc., Ecologist/Botanist Gillette, WY: 2006-Present Responsibilities in this position include reclamation monitoring, wetland delineations, vegetation surveys, including threatened and endangered plant surveys.
